Methodology.

207(n) students surveyed. Random samples collected by random choice of 4 roll call groups each group consisting of a random mixture of students. The survey was administered in two parts. Part A consisted of 22 question's. Question one and two measured in scale the following 21 question's calculated nominal Likehert, 1 – 5, 1=strongly agree, 2=agree, 3=neither, 4=disagree, 5= strongly disagree. Part one completed one day, Part two completed the following day. Part two consisted of Question one and two measured in scale the following 21 question's calculated nominal Likehert, 1 – 5, 1=strongly agree, 2=agree, 3=neither, 4=disagree, 5= strongly disagree. Two open ended questions evaluated the student's opinion regarding 1. improvements the school could make. 2. the things the student liked about the school. As the survey was completed on two separate days a slight variance of student participation may have altered results slightly. Part A and Part B data inputed jointly. Year and gender totalled. Survey's have been numbered according to data input for auditing purposes. Ambiguous answers all entered in the closest answer towards the neutral (neither=3) Blank results input a 0 excluded pairwise.

12 students did not complete back page of survey part B questions 33,34,35,36 altering results.
